EDUCATION EXPERIENCES

Undergraduate **Shanghai Jiao Tong University** Senior   *Shanghai, China*
Computer Science and Technology (CS)
@ School of Electronic, Information and Electrical Engineering (SEIEE)
                                                                          Expected 2019–2023

Mathematics @ School of Mathematical Sciences   *Transferred 2018–2019*
GPA | 3.71/4.3   *CET6* | 545 (Oral: B+)
A/A+ Courses | VR, Machine Learning, Data Visualization, Mathematical Foundamental in Computer Sciences, Compiler Principles, Computer Architechture Labs

SKILLS

Programming ✔ Familiar with interface programming like FLTK in C/C++ GraphGenDecomp, Win-Form/WPF/XAML in VB.NET/C# ClassBookController DialogCreator, Typesetting of LaTeX AutoBeamer.   *2015–2021*
 Acknowledge OpenCV, pandas, pytorch and networking Networking in Python.
                                                                          2019–2021
 Acknowledge webpage making in HTML/CSS/JavaScript LaTeXSparkle (Blog), and use JavaScript framework Vue.js PGFPlotsEdt.   *2020–2021*
 Get started with Java OS-Projects and Rust CompilerPrinciple.   *2020*

Visualization ✔ Familiar with Video Editing in Premiere, Special Effects in After Effects, 3D Modeling in Cinema 4D.   *2012–2020*
 Acknowledge Unity to make 3D interactive programs. PowerPoint Lecturer.
                                                                          2019–2020

Open Source Acknowledge cmd/PowerShell/bash script languages, version control tool Git, and continous integration tool GitHub Actions.
 Member of SJTUG. Chinese TeX Society CTeX-org committer learnlatex.github.io. Give lectures about LaTeX sjtulib-latex-talk.
 Participate in VS Code Chinese Group Sharing. Finish 2021 Microsoft Open-Source Study Group Projects mnist-calculator custom-tensor-op qlib-CNN.   *2021*

HONORS

National Undergraduate IOT Design Contest · HarmonyOS Special Award (Top 10)
                                                                          2022
Contribution | Develop a HarmonyOS App based on the technology of distributed database, to service the hybrid class with social distancing. Build a cloud platform to interconnect clients, web, and a hardware.

Mathematical Contest in Modeling (MCM) · Meritorious Winner   *2021*
Contribution | Redefine the distance of DBSCAN in sklearn library, in order to perform a better prediction in the range of wildfire. Perform geographical calculations in Mathematica.

SJTU Scholarship · Class C   *2018–2019, 2020–2021*

COMMUNITIES

SJTU Linux User Group · SJTUTeX Maintainer   *2021*
Related Work | Maintainer of LaTeX Beamer Template SJTUBeamer ★ 309.

SJTU Art Center · Leader of Tech Division   *2019–2020*
Related Work | Video Producer. Create multi-streaming software ACLiveConsole ★ 7 to manage NGINX visually, support art processing of bilibli danmaku, and fluent PGM animation. The software has serviced multiple events, including the commercial ones.
